

A series about animals

written and illustrated by Bartek Brosz

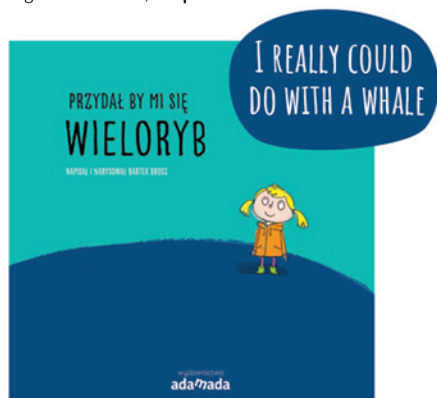

What a mess! **A tiger** must have done this! And he's probably hiding somewhere... Let's start tidying up. He's bound to turn up. Hmm... Still no sign of the tiger, but the mess has vanished....

Have you ever wondered what it would be like to have **a gorilla** at home instead of a dog, cat or hamster? Would he help everyone in the house? Could you play with him at home and take him to kindergarten? Would you also like to have a gorilla?

And tell me, could you do with **a whale**? He could live in the bathtub or in a paddling pool, read books at bedtime, and be an island with pirate's treasure. Maybe someone else could do with a whale too?

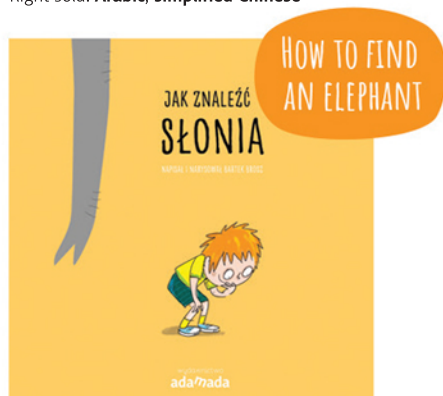

Right sold: **Arabic, simplified Chinese**

Or maybe you would like to find **an elephant**? Surely you would love to play hide-and-seek with him in your back yard or in the garden? And if so, you maybe look for him at the swimming pool or under the bed. Where would you look for him?

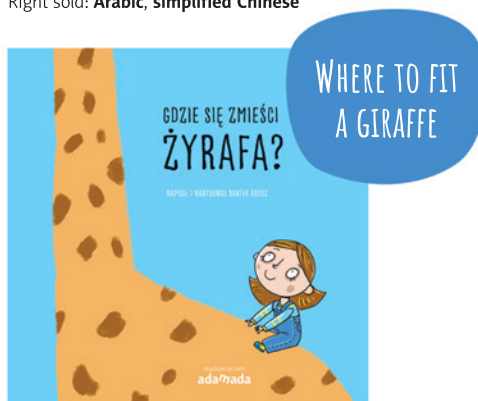

Where to fit **a giraffe** with its long neck? Just in case, it might be worth looking for a good place now. And what if the room is not high enough? Then you'll have to become an architect and design one yourself. Because a giraffe has to live somewhere, right?

Right sold: **Arabic, simplified Chinese**

Answers to all of the above questions are provided in a series of illustrated books by **Bartek Brosz** – about children and their unusual pets.
