The "brainteasers" series features tasks to develop a child's spatial imagination.

In order to solve the tasks from part 1 (age 6+) and part 2 (age 8+) you do not need any particular school knowledge – you can rely on your natural abilities and intuition. In part 3 (age 10+) some awareness of geometry is an advantage.

All six books can be recommended as fun to make you think, whether at home, in the waiting room, or during a trip. However, they can also be used successfully at school, during the lesson or in a mathematics club.
